WHAT IS CLAIMED IS

5

1. A control adapter device for attaching to a control unit having an input control part, the control adapter device comprising:

10 a connector for electrically connecting the control adapter device to the control unit;
a transmission unit for transmitting, by wireless transmission, a signal input that is input from the input control part; and
15 an engagement mechanism for engaging the control unit.

20 2. The control adapter device as claimed in claim 1, wherein the engagement mechanism includes:

an engagement member for engaging a wall of the control unit;
25 a shaft rotatably supporting the engagement member; and
an urging member for biasing the engagement member to an engagement position.

30

3. The control adapter device as claimed

-17-

in claim 2,

wherein one end of the engagement member has a press-maneuver part for receiving a pressing force, and the other end of the engagement member
5 has an engagement claw that is received in an engagement hole forming part of a wall of the control unit,

wherein the urging member biases the engagement member in the vicinity of the press-
10 maneuver part.

15 4. The control adapter device as claimed in claim 2,

wherein the urging member is a torsion spring,

wherein a coil portion of the torsion
20 spring is housed in the engagement member,

wherein one end of the torsion spring biases the engagement member in the vicinity of the press-maneuver part.
